PRECIPITATION RECORDS

Monthly, from U. S. Weather Bureau..... 111
Season, 1944-45 112

ORGANIZATION

C. H. Purcell . . . . . Director of Public Works
Edward Hyatt . . . . . State Engineer
A. D. Edmonston . . . . . Assistant State Engineer

Gordon Zander - Principal Hydraulic Engineer

This Bulletin was Prepared

By

George B. Gleason - Supervising Hydraulic Engineer

Assisted by

H. C. Kelly . . . . . Senior Hydraulic Engineer
J. J. Heacock . . . . . Associate Hydraulic Engineer
W. H. Overshiner . . . . . Assistant Hydraulic Engineer
N. J. Tanguay . . . . . Assistant Hydraulic Engineer

T. R. Merryweather . . . . . Administrative Assistant

FOREWORD

The well records here given are a continuation of those published in Bulletins 39 to 39-M, inclusive. Descriptive data for most of the wells and maps showing their locations are given in Bulletin 39. Descriptive data for wells not included in Bulletin 39 are given in Bulletins 39-A to 39-M, inclusive. Some of these latter wells are not shown on the maps in Bulletin 39.

Records of ground water levels at wells in San Jacinto and Antelope Valleys are continued in this bulletin. The locations are shown on Maps 9, 10, and 11 given in Bulletin 39-J. The wells in these valleys are numbered by Township, Range and Section, i.e.; Well Number 5S2W1A is located in Township, 5 South, Range 2 West, S.B.B. & M. in Section 1. The letter "A" denotes that it is the first well numbered in that section. The letter "B" would be the second well, etc.

The San Jacinto Valley wells are shown on Maps 9 and 10. The tabulation begins in the northwest corner of Map 9 and progresses east and south. The townships are all south of the meridian so they are in numerical order but the ranges are both east and west and are not in numerical order.

The Antelope Valley wells are shown on Map 11. They are tabulated by Township and Range so both are in numerical order. The tabulation begins in the southeast corner of Map 11 and progresses west and north.

The precipitation records here given are a continuation of those published in Bulletins 39-A to 39-M, inclusive. In the former bulletin is a map showing locations of stations listed in 1932. Stations not shown on the map in Bulletin 39-A are described as to location in

the bulletins following that publication. The totals are for the period July 1st to June 30th. There is a tendency on the part of the observers to neglect the minor storms, particularly those occurring at the beginning and at the end of the season. Through inspection of the records at nearby stations, the amount of precipitation so neglected has been estimated. This amount has been added to the recorded precipitation and an asterisk indicates where such an addition has been made.

Monthly totals for several precipitation stations are included to show the distribution of rainfall in various localities.

Records of daily precipitation for most of the stations included herein are available in the office of the Division of Water Resources.

Cooperation of the agencies through which the records have been made available is appreciated. Proper credit is given in the tabulation of data for each well and in the table showing precipitation data.

It is believed that records published herein provide sufficient coverage for most purposes. Additional records are available in the Los Angeles office of the Division of Water Resources.
